

Elms

As in previous terms we will be aiming to make links between curriculum areas in our learning. Our main topic is Henry VIII and his six wives. We will be writing love letters, diary entries and recounts as part of our work and investigating what different sources can help us learn more about this time. In Art we will be creating portraits, using Tudor images as a starting point to help us learn more about this artistic tradition.

We will continue to develop our understanding of a range of different areas within mathematics, focusing on quick recall of number facts and looking for patterns in arithmetic whilst developing our core numbers skills. We will also be moving on to focus on shape and time.

In science we are focusing on weather and exploring the water cycle, how clouds are formed as well as investigating extreme weather conditions. Literacy and ICT will be incorporated into this work when we become weather presenters. In term 6 we will be finding out about light and shadows as well as taking part in a school science fortnight.

Our RE question is 'Who is a Muslim and what do they believe?'
