

Running Rivers

This term the Super Sycamores are going to be preparing for their very own Art's Award. We will be experiencing as many types of repeat pattern printing as we can, taking our inspiration from the patterns from the fabrics of the Indus valley. This will lead to them creating their own piece of work for an art show.

We will be learning about the Indus Valley and it's important civilization that was built around the banks of the Indus River. How did they live? What was special about them and the valley they lived in? We will also take a closer look at rivers, where they come from and where they go.

In science the Sycamores will be exploring States of Matter; how gas, liquid and solids are related and how we can change from one to the other and can they go back to their original state.

During literacy this term we will be experiencing the writing of Neil Gaiman and his book 'Coraline'. We will be using his writing for our inspiration to write our own mystery story.

In numeracy we will learning the written method for multiplying and division. This will mean working hard to put all the skills of partitioning and addition from term one and two into practise.
