

Willows-To Infinity and Beyond!

5, 4, 3, 2, 1 BLAST OFF!

Join us on our adventures as we journey into space through literacy, writing space adventures, space poems and wanted posters for those cheeky aliens causing havoc in space!

As we travel into space and beyond we will be using our maths skills to use directional language for our Beebot aliens and space vehicles to programme sets of instructions as we manoeuvre around space and planets dodging meteorites and comets.

We will be researching and plotting a timeline of the history of space exploration and designing and making rockets and space craft using everyday materials.

Through music and PE we will be listening to the War of the Worlds music CD as we practise and perform movement in dance.

For our class role play area we will be designing our own space shuttle with control panels from empty chocolate and gift boxes and inserts leftover from Christmas presents and making alien and space explorer passports.

Science this term is focusing on Animals Including Humans and we will be investigating what an alien would need to know about humans and aliens when visiting Earth. This term our investigations will be exploring our senses.

Our RE begins with an exciting whole school Faith in Action week with a pilgrimage to various places of worship in Canterbury, special visitors and widening our learning experiences of faith. Willows will then be discovering peace, forgiveness and trust through The Gospels.
