

(Term 3)

Travelling Ted

This term, Acorns will be exploring places all over the world while Ted goes on his travels. With so many places around the world, we will definitely come across animals that live there and will be investigating animal categories and features of different animals through Science.

We will be taking a look at artwork from different countries including African Kente cloth, Mexican maracas, Japanese hand fans and Indian Rangoli patterns. With all the amazing artwork we will be looking at, we will need some great new vocabulary to help us describe what we are seeing in literacy!

We kick started this term with our Faith in Action week and will continue to learn some of the many special stories in the Bible and just what it is about them that makes them special to us.

You will be so impressed with our Maths this term as we find out more about addition and subtraction through counting on and counting backwards, place value or numbers 0-20 and even starting to count in multiples of 2, 5 and 10.

Please come and talk to us if you want to find out more. We will be sending home class newsletters to keep you informed with any important information when necessary and also events that are coming soon.

(Term 4)

New life

Acorns will be exploring all things spring related this term!

We will be looking closely at plants in science, how to categorise them, what makes a plant a plant and how we can grow them. This will link in with our maths topic of measuring. I wonder whose beanstalk will grow the tallest?

We will definitely need some instructions to go along with how to grow our plants and how to measure them correctly. In literacy we will be learning all the instructional language we need so that anyone can follow our investigations!

Lots of creepy crawlies and small animals come out in the spring time and we will be exploring them through Eric Carle stories, because who doesn't love 'The very hungry caterpillar', 'The angry ladybird' and 'Mr Seahorse'?
