Term 3 - Into the gallery.

This term we are very much looking forward to exploring all different forms of art such as paintings and sculptures. Through our topic we will be creating our own masterpieces and exploring different materials and techniques. We will even be setting up our own art gallery in our class to show off our excellent work! Together we will discover different styles of art and look at the history behind different artists and their art work. During science we will be investigating how different variables such as light may affect our works of art.

Within R.E we will be asking the question "Was it always easy for Jesus to show friendship?" and looking at not only Jesus as a friend, but how we can be better friends ourselves and will express this through art.

We are kickstarting the term by adding to our repertoire of sounds and developing skills such as blending and segmenting within phonics. As excellent mathematicians, we will be enhancing our mathematical skills and mastering our understanding of place value through problem solving.

We are excited to see what this term brings and exploring our topic further.

Please come and talk to us if you want to find out any more. We will be in contact soon to keep you informed with any important information and also events that are coming soon.
