

Getting Physical

This term the Super Sycamores are exploring physical geography. We are going to find out how physical geography varies across the world. We will also look at human geography where we will learn about where people have settled next to volcanoes or rivers and investigating the Indus Valley and the important civilization that was built around the banks of the Indus River.

In science the Sycamores will be exploring States of Matter: how gas, liquid and solids are related; how we can change from one to the other and can they go back to their original state?

During literacy this term we will be experiencing the writing of Helena Duggan with the book 'A Place Called Perfect'. We will be using his writing for our inspiration for our own writing. Also we will practise our non-fiction writing and poetry.

In numeracy we will be using the written method for multiplying and division. This will mean working hard to put all the skills of partitioning and addition from term one and two into practise to solve problems and reason our answers.
